February 14, 1989

MEMORANDUM FOR SECRETARY OF DEFENSE

SUBJECT:

Defense Satellite Communications Interoperability

(U)

25X1

In view of the above, and pursuant to the national policy objectives of NSDD-97 and EO 12472 for interoperability of our national security telecommunications, the Secretary of Defense in coordination with the Director, Central Intelligence (DCI) and other appropriate Federal agencies, is requested to develop a national-level plan to ensure the most cost-effective and timely approach for funding and implementation of the next generation of SHF MODEMs that are to be based on an approved government standard waveform. To ensure survivability and interoperability objectives are met for operational requirements between U.S. users and with our allies, a configuration control management process and DSCS user access control procedures for compliance to the approved interface standards (waveform and system control) should be included in this plan and its associated implementation strategy. (S)
